## No One Gets Cancer Alone

**Title:** No One Gets Cancer Alone

When cancer affects one, it affects many...

...children... spouses... colleagues... friends.

No one gets cancer alone...

But as many are affected, many fight back...

Our company, sanofi-aventis, is in the fight with them... and with all families and loved ones facing cancer.

Sanofi-aventis is one of the world's leading researchers and developers of innovative oncology treatments...

We're a partner in health, hope, and recovery for cancer patients everywhere.

And as we partner beyond our walls, we also partner within... for the health and wellness of our own colleagues

While the cancer battle is individual, it is not fought alone. We're in it together.

And together, we'll work harder, we'll reach farther—and we will persist, so that one day... cancer may not.
